New policy as of October 22 for pupils missing from education. The questions asked may be different and the call handler will ask specific risk questions to ascertain risk. If the call handler does not feel there is a risk currently the school will be told that no staff will be deployed until an inspector has assessed the information.

Our statistics for Term 1

Including referrals

Overall, in school there has been an increase in the amount of concerns reported. However, not necessarily the amount of reportable concerns. This, we believe, is due to our new reporting tool CPOMS which allows us to discuss low level concerns directly and easily. This is a good thing!!

For example, on cpoms during term 1 there have been 64 concerns raised flagged as safeguarding or child protection.

However, following DSL intervention, triage and discussion there were only 2 reportable incidences via front door services.

This excludes referrals made externally for PA support, early help, social work teams. It also excludes where duty and advice have been used to discuss specific cases as professionals.

Thank you, Keep reporting! You are our eyes and ears on the front line :)
